DETAILED ACTION

1. Claims 1-16 are pending in the application.

Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 1-16 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.
 - (i) Claims 1, 3, 5, 7, 9, 11, 13, and 16 are directed to a method and circuit that merely perform calculations and manipulation of data. In order for such a claimed invention to be statutory, the claimed invention must accomplish a practical application. That is the claimed invention must transform an article or physical object to a different state or thing, or produce a useful, concrete, and, and tangible result; see State Street 47, USPQ2d. It is clear from independent claims 1, 3, 5, 6, 9, 11, 13, and 16 that the claimed invention merely involves calculations and manipulations of data; that is in the

calculating of sine and cosine functions. Merely outputting the result does not overcome the rejection. The result produced by the invention, as recited in the claims, does not have a real world value but merely a number without a practical application that makes the result useful, concrete, and tangible. Therefore, independent claims 1, 3, 5, 6, 9, 11, 13, and 16 are directed to non-statutory subject matter as the claimed invention fails to accomplish a practical application. A suggested way to overcome the rejection is to bring into the claims, as taught in the specification, specifically what the outputted sine and cosine functions are used for.

(ii) Claims 2, 4, 6, 8, 10, 12, 14, and 15 are rejected for similar reasons as discussed for their respective parent claims, as they fail to present any limitations that resolve the deficiencies of the claim from which they depend.

Allowable Subject Matter

5. Claims 1-16 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 101, set forth in this Office action.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
